

Technical Data Sheet

Vertical Farming Clone & Veg Cart

Montel's Clone & Veg Cart is designed for the cannabis industry as it is mostly used at the cloning stage, but can also be used to transport items around the facility. Its light weight aluminum construction makes it rust proof and easy to move and handle without sacrifice for capacity.

FEATURES:

- A. Powder Coated Aluminum Construction
- B. Adjustable Shelves
- C. Optional Stainless Steel Dry Rods
- D. Stainless Steel Caster Wheels
- E. Stainless Steel Hardware

BENEFITS:

- A. The frame is made of bolted aluminum channels to make it lightweight, stiff, and rust proof. It is powder coated to make cleaning easier.
- B. Shelves are also made of powder coated aluminum and they can be adjusted at 1 1/2" increments. Capacity is 50 lbs per shelf.
- C. The Clone & Veg Cart is also compatible with hanging rods. They are made of stainless steel for thorough cleaning and can be adjusted like the shelves.
- D. Stainless steel caster wheels are ideal for this application as they will keep the floor free from rust residues. Wheels, which are made of hard plastic, are non-corrosive, non-marking, have excellent moist & wet environments and are resistant to most chemicals. There are two locking casters per Clone & Veg Cart.
- E. All hardware is stainless steel for ultimate rust resistance.

Vertical Farming Clone & Veg Cart

APPLICATION:

Montel's Clone & Veg Cart is designed for the particular process cloning and seeding plants but can also be used as a transporting mean between different facility rooms.

TECHNICAL SPECIFICATIONS:

- **Frame:** Made of bolted aluminum construction and powder coated. All the hardware is made of stainless steel.
- **Shelves:** Made of aluminum and powder coated. They are adjustable at 1 1/2" increments and can withstand a uniformly distributed load of 50 lbs.
- **Drying Rods Shelves:** They are adjustable at 1 1/2" increment and the drying rods are made of stainless steel.
- **Wheels:** The casters are made of stainless steel and the wheels are made of hard plastic, are non-corrosive, non-marking, have excellent moist & wet environments and are resistant to most chemicals. Wheels are 4" in diameter.

DESIGN AND CAPABILITIES:

Load Capacities & Dimensions	
Width	52" (132 cm)
Depth	24" (61 cm)
Frame Height	75" (213 cm)
Overall Height	80" (226 cm)
Shelf Capacity	50 lbs (23 kg)
Cart Capacity	250 lbs (114 kg)
